----- Valley fold
----- Mountain fold

1) White side up, 1x4.

2) Valley fold in half, and fold a waterbomb base at the top.

3) Turn the model over, and valley fold the top layer.

4) You will get this.

5) Valley fold along the lines indicated.

6) Valley fold the horns inward.

7) Accordion fold as shown. Pleat fold the nose and tip of the nose.

8) Valley fold as shown, using the accordion folds as a guide.

9) Accordion fold again, but only part of the way.

10) Accordion fold only as shown. Note the key folds. Fold inwards. This may be tricky.

11) You should get something like this.

12) Tuck in the excess paper in the head.

13) Turn sideways, and fold the tail as desired.

14) Reverse fold and outside reverse fold the folds from the previous step, so the model does not easily unfold.

15) On both sides of the model, fold back the bumps on the back as shown.

16) The finished dragon. You can move the head, and fold the tail differently as desired.
